PROFESSIONAL SUMMARY

Computer Science graduate and aspiring Software Engineer with hands-on experience developing full-stack web applications using JavaScript, Node.js, Express.js, EJS, React, PostgreSQL, HTML5, CSS3, and Bootstrap. Experienced in frontend and backend development, REST APIs, server-side rendering, database integration, routing, forms, application logic, debugging, and responsive web development.

Built and deployed a clothing e-commerce web application featuring product management, shopping cart functionality, product sizes, quantity controls, PostgreSQL database persistence, and responsive user interfaces. Currently developing skills in TypeScript, API development, AI integration, and modern full-stack software engineering.

TECHNICAL SKILLS

Programming Languages: JavaScript, SQL, HTML5, CSS3

Frontend Development: React, EJS, Bootstrap, Responsive Web Development

Backend Development: Node.js, Express.js, REST APIs, Server-Side Rendering

Databases: PostgreSQL, SQL, Supabase

Tools & Platforms: Git, GitHub, VS Code, Render, Linux, WSL

Currently Developing: TypeScript, API Development, AI Integration, Modern Full-Stack Development

PROJECTS

Clothing E-Commerce Web Application

Node.js | Express.js | EJS | PostgreSQL | Bootstrap | JavaScript

- Built and deployed a full-stack clothing e-commerce web application using Node.js, Express.js, EJS, PostgreSQL, Bootstrap, and JavaScript.
- Implemented product management, product display, stock information, and dynamic server-side rendering.
- Developed shopping cart functionality supporting product quantities and clothing sizes including S, M, L, and XL.
- Designed and integrated PostgreSQL database structures for products and cart items.
- Created backend routes, form handling, application logic, and database operations using Express.js.
- Used reusable EJS components to structure and maintain the application interface.
- Integrated frontend interactions with backend routes and persistent database operations.
- Used Git and GitHub for version control and deployed the application using Render.

CNN Pneumonia Detection — Final Year Project

Machine Learning | Convolutional Neural Networks

- Evaluated the effect of different learning rates on CNN architectures for pneumonia detection.
- Applied machine learning and image classification concepts to medical image analysis.
- Conducted experiments to determine how learning-rate changes affected CNN performance.
- Compared model performance across different learning-rate configurations.

PROFESSIONAL EXPERIENCE

SQI College of ICT

Software Development Intern / Trainee

- Developed practical software development skills through hands-on programming and web development training.

- Strengthened programming fundamentals, debugging, and problem-solving skills through practical development tasks.
- Applied software development concepts to programming and web development projects.

BHN Truck Logistics

NYSC/PPA — Breakdown Department

- Entered information relating to broken-down trucks into the company database.
- Maintained accurate records of damaged truck parts, breakdown information, and operational data.
- Supported documentation and movement of damaged truck parts for processing.
- Worked with company records and database information as part of the breakdown department workflow.

EDUCATION

Redeemer's University — Nigeria

Bachelor of Science (BSc) in Computer Science

CORE COMPETENCIES

Full-Stack Web Development • Frontend and Backend Integration • Backend Development • Database Integration • REST API Development • Server-Side Rendering • Problem Solving and Debugging • Software Development Fundamentals • Responsive Web Development • Independent Learning and Technology Adoption

CAREER INTERESTS

Software Engineering | Full-Stack Development | Backend Development | Web Applications | API Development | AI Integration
